

Draw Your Movie

Name: _____

Year: _____

Use the storyboard template below to create individual frames for your film using inspiration from your own archive, belonging and landmarks. You could merge the different ideas you have and plan your own scenes, but think about how you want your story to look - does it have a narrative flow or is it random? Do you want to focus on one of the themes (archive, landmarks or belonging) or a combination of all three? Be as detailed or as abstract as you would like - film is not always about creating the perfect scene but often about experimenting and trying new things!

Cut along the lines
